DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: Claim 1 ends with “; and” instead of a period. Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-14 and 25-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 and 21-36 of U.S. Patent No. 6,678,501. Although the conflicting claims are not identical, they are not patentably distinct from each other because, while the identified claims of the patent comprise the subject matter contained in the claims of the application, the claims of the patent contains additional subject matter. Nevertheless, omission of an element and its function in combination is an obvious expedient if the remaining elements perform the

same functions as before. In re KARLSON (CCPA) 136 USPQ 184 (1963). Therefore, the claims of the application are obvious over the claims of the patent. See the subject matter correspondence table below.
